

Arcade Hub wireframes

Every screen in the customer ordering app as it is built today: what sits where, how you get to it, where it leads, and which parts run on real data. Wireframes are deliberately low fidelity so layout and flow stay in focus, not colour or imagery.

Flutter app · 23 screens and sheets Brand red marks the logo and primary actions

Traced from the code on 15 September 2026

- Live data
- Placeholder content
- Broken or misleading
- Not linked from anywhere

Dashed outlines inside a wireframe mark the part the tag refers to.

Key journeys

The paths a customer actually takes, in order. Red steps are where the journey stops working.

Order food at the table

● Stops at checkout

Home → Drawer · Food & Drinks Menu → Product detail · size, add-ons → Add to cart →
Cart → Sign-in sheet if guest → Checkout · route missing → Order success

There is no direct way into the menu from the Home screen itself; customers reach it through the drawer, a zone page, or the empty-cart button. Checkout is built but the router has no path for it, so the button fails.

Book a gaming session

● Nothing reaches the venue

Home → Zone card or bento tile → Zone detail · Book → Service booking · accept terms →
Confirm · waits 1 s, sends nothing → Order success · fake order

The customer ends on the order success screen, which shows a hardcoded order for nachos and mocktails rather than their booking.

Find the venue

● Works

Home · scroll to Find us → Tap building or pin → 4th floor plan sheet

Or “Get directions” on the same card opens Google Maps with the venue as the destination.

Check a past order

● Works when signed in

Orders tab → Order card → Order detail · Placed, Kitchen, Served

Guests see a sign-in prompt on the Orders tab instead of a list.

Launch and sign-in

No bottom tabs on these screens. The app never forces sign-in: everyone lands on Home, and sign-in is asked for only at checkout, booking, or from the drawer and Profile.

Splash

Order. Pickup. Enjoy.

/splash

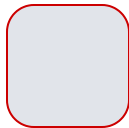

● Branded

ON SCREEN

Logo in its lit marquee tile, "Arcade Hub", tagline, spinner, over the near-black launch background.

GOES TO

Home after 1.3 seconds, whether or not the customer is signed in.

Bottom tabs

Home, Cart, Orders and Profile share a bottom tab bar. The Cart tab shows a badge with the item count.

Home

/home

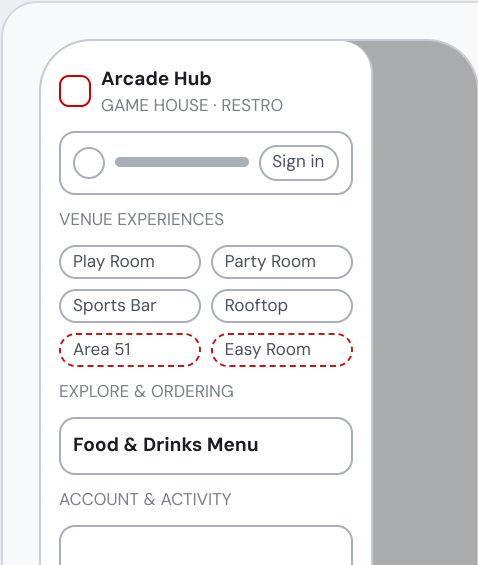

- Zones
- Promo card
- Find us map

TOP TO BOTTOM

- Header: logo tile with a light sweep, name, hamburger for the drawer
- Zone slider with photos, each opening its zone page
- App-exclusive discount ticket
- Explore the Hub: rotating grid of zone tiles
- Bundle Deals: horizontal cards, or an empty state
- Find us: 3D block map, tap the building for the floor plan

The discount ticket promises 10% off from 10 AM to 4 PM, but no discount is configured, so checkout never applies it.

Zone photos and copy are invented, and no products appear anywhere on Home.

Side drawer

opens over Home

- Navigation
- Zone list

REACHED FROM

The hamburger on the Home header.
